- SLNC Adapts accepted applications that targeted high need communities in two application categories: EZ and Project. EZ grants are small, focused efforts to increase digital access. Project grants are for larger, collaborative initiatives that leverage partnerships in local communities to address the digital divide.
- Adapting Technology will allow for libraries to improve library operations through the purchase of technology that support efforts to enable libraries to reach residents, especially in support of education, health, and workforce development needs; and/or to respond to the pandemic and implement public health protocols.
- The State Library is offering a statewide subscription to all public libraries to use with their patrons for Northstar, a digital literacy training tool.
